#### 2. MANAGEMENT DISCUSSION AND ANALYSIS

#### 2.1 Brief analysis of general operating performance during the period under review

(1) Brief analysis of general operating performance

During the period under review, the operating results of the Company grew significantly as a result of implementation of business strategies such as stabilizing production volume in existing coal mines, increasing coal sales volume in the domestic market and increasing coal sales prices.

During the period under review, the Company's revenue from principal operations was RMB2,350.746 million, representing an increase of RMB343.073 million or 17.1% over the same period in 2003. Income from the sales of coal was RMB2,294.059 million, representing an increase of RMB320.153 million or 16.2% as compared with the same period last year. Of the increase in revenue from principal operations, RMB176.794 million was attributable to the increase in sales volume, and RMB143.359 million was attributable to the increase in selling prices.

During the period under review, the Company's cost of principal operations was RMB1,050.4 million, representing an increase of RMB109.006 million or 11.6% over the same period in 2003, among which cost of sales of coal products was RMB1,031.636 million, which has increased by RMB110.642 million or 12.0% as compared with the same period last year. The unit cost of coal sales was RMB102.55/tonne, representing an increase of RMB2.80/tonne or 2.8% as compared with the same period last year. The increase in the unit cost of coal sales was mainly attributable to increase in commodities prices and a decrease in the rate of refund of coal export tax.

During the period under review, the proportion of the expenses to the total profit of the Company decreased from 170.58% to 111.61% as compared with the previous reported period, representing a decrease of 34.57%. This was mainly due to a substantial increase of total profit.

During the period under review, the proportion of investment income to the total profit of the Company decreased from 0.62% to 0.21% as compared with the previous reported period. This was mainly due to (i) the profit from principal operations substantially increased in the period under review; (ii) during the period under review, the Company has not received the investment income from Shanghai Shenneng Company Limited and Jiangsu Lianyun Port Company Limited for the year 2003, whereas total profit in the previous reported period accounted for such investment income for the year 2002.

During the period under review, there was no subsidy income.
